

Results of WGS of Serbian AIV isolates in period 2022/2023

30th Annual Meeting of the National Reference Laboratories for Avian Influenza and Newcastle Disease of European Union Member States October 10-11, 2024 Mestre, Italy

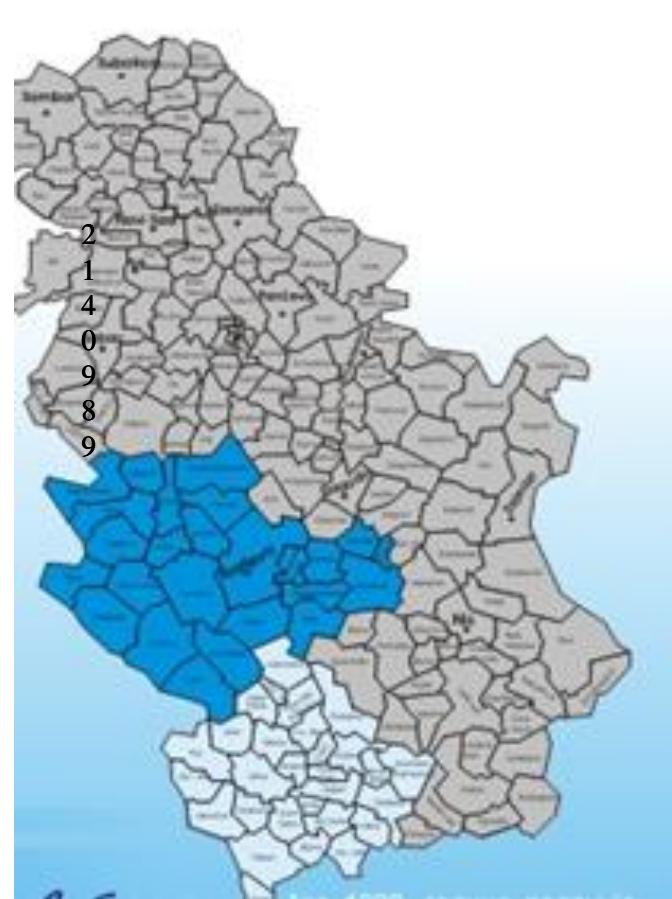

**Dr sci. Vet. DEJAN VIDANOVIĆ, virologist
VETERINARY SPECIALIZED INSTITUTE "KRALJEVO", Serbia**

Milanko Šekler, Bojana Tešović, Zoran Debeljak, Nikola Vasković, Kazimir Matović, Aleksandar Žarković, Aleksandar Tomić, Mihailo Debeljak, Mišo Kolarević

Some facts about Republic of Serbia

- **Area 88.499 km²**
- **Cattle 725408**
- **Sheep 1.716.000**
- **Pigs 2.140.000**
- **Poultry 14.278.000**

Veterinary Specialized Institute Kraljevo

National Reference Laboratory for:

- **Avian influenza (AI)**
- **Newcastle disease (NDV)**
- **West Nile fever (WNV)**
- **Chlamydiosis**
- **Mycoplasmosis**
- **Gumboro disease (IBD)**
- **Infectious Bronchitis (IBV)**
- **Capripox viruses**

Employees

- 45 employees
- 12 DVM (6 PhD, 5 MSc, 8 vet. specialists)
- 2 chemist (1 MSc)
- 20 vet. technicians
- 8 Admimistrative and helping stuff

National monitoring program for avian influenza in Serbia

Active monitoring

- Backyard poultry in risk areas: The following types of domestic poultry are included in the supervision: ducks, geese, chickens (all age and production categories), quail (Japanese), all other ornamental poultry and farmed birds (hobby birds and poultry).
- Domestic poultry, farmed and ornamental poultry in markets, fairs and exhibitions
- Migratory wild waterfowl, especially those whose natural habitat is related to water bodies (ponds, swamps, lakes), which Serbia abounds in.
- Poultry from intensive farm production

Passive monitoring

- All dead or sick wild or domestic birds
- Wild carnivores

National monitoring program for avian influenza in Serbia

Прилог I. - Попис „чиљаних врста“ дивљих птица које се приоритетно узоркују у оквиру програма мониторинга авијарне инфлуенце дивљих птица у Републици Србији

Број	Латински назив	Име по српској именклатури
1.	<i>Accipiter gentilis</i>	Јастреб
2.	<i>Alopochen aegyptiacus</i>	Египатска утва
3.	<i>Anas acuta</i>	Шилкан
4.	<i>Anas crecca</i>	Краца
5.	<i>Anas platyrhynchos</i>	Глувара
6.	<i>Anser albifrons</i>	Лисаста гуска
7.	<i>Anser anser</i>	Дивља гуска
8.	<i>Anser brachyrhynchus</i>	Краткољуна гуска
9.	<i>Anser erythropus</i>	Мала лисаста гуска
10.	<i>Anser fabalis</i>	Гуска глоговњача
11.	<i>Ardea cinerea</i>	Сива чапља
12.	<i>Aythya ferina</i>	Риђоглава патка
13.	<i>Aythya fuligula</i>	Тубаста патка
14.	<i>Aythya marila</i>	Морска црнка
15.	<i>Botaurus stellaris</i>	Водени бик
16.	<i>Branta bernicla</i>	Гриваста гуска
17.	<i>Branta canadensis</i>	Канадска гуска
18.	<i>Bubo bubo</i>	Буљина
19.	<i>Bucephala clangula</i>	Патка дупљашница
20.	<i>Buteo buteo</i>	Мишар
21.	<i>Buteo lagopus</i>	Гаћести мишар
22.	<i>Larus ridibundus</i>	Обични галеб
23.	<i>Ciconia ciconia</i>	Бела рода
24.	<i>Cygnus cygnus</i>	Велики лабуд
25.	<i>Cygnus olor</i>	Лабуд грбац
26.	<i>Casmerodius albus</i>	Велика бела чапља
27.	<i>Egretta garzetta</i>	Мала бела чапља
28.	<i>Falco peregrinus</i>	Сиви соко
29.	<i>Haliaeetus albicilla</i>	Белорепан
30.	<i>Larus argentatus</i>	Сребрнасти галеб
31.	<i>Larus canus</i>	Сиви галеб
32.	<i>Limosa limosa</i>	Муљача
33.	<i>Anas penelope</i>	Звиждара
34.	<i>Anas strepera</i>	Четртуша
35.	<i>Mergellus albellus</i>	Мали ронац
36.	<i>Mergus merganser</i>	Велики ронац
37.	<i>Netta rufina</i>	Превез
38.	<i>Pelecanus crispus</i>	Кудрави несит
39.	<i>Pelecanus onocrotalus</i>	Ружичasti несит
40.	<i>Phalacrocorax carbo</i>	Велики вранац
41.	<i>Pica pica</i>	Сварка
42.	<i>Podiceps cristatus</i>	Тубасти гњурац
43.	<i>Podiceps nigricollis</i>	Црнонретни гњурац
44.	<i>Porphyrio porphyrio</i>	Султанка
45.	<i>Somateria mollissima</i>	Гавка
46.	<i>Tadorna tadorna</i>	Шарена утва
47.	<i>Tachybaptus ruficollis</i>	Мали гњурац
48.	<i>Tringa ochropus</i>	Спрудник пијувача
49.	<i>Turdus pilaris</i>	Дрозд боровњак

National monitoring program for avian influenza in Serbia

Active monitoring September, October, November, March, April, May
Passive monitoring – whole year

Species of wild birds 2023

Wild - Greylag goose	H5N1 x 2
Wild - Black headed gull	H5N1 x 4
Wild - Mute Swan	H5N1 x 11
Wild - Common crane	H5N1 x 4
Wild - Rook	H5N1 x 1

AIV diagnostic methods in VSI Kraljevo

- RNA extraction on Kingfisher mL and Kingfisher Flex
- RT-qPCR on AriaMx devices
- Influenza A -Wise and Heine protocols
- H5 - Slomka et al., 2007
- H5 RT-qPCR Pathotyping (FLI protocol)
- H7 - Hassan et al., 2022
- H9 - Monne et al. 2008
- N1 - Payungporn et al., 2006
- Other subtypes - SOP VIR 1004 IZSV

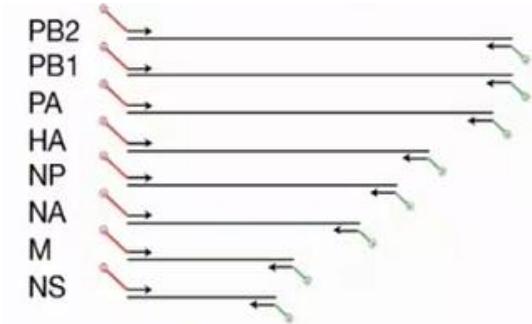

AI^V diagnostic methods in VSI Kraljevo

- Isolation of the virus on embryonated chicken eggs
- Typing by conventional (using reference sera) or molecular methods (RT-PCR, NGS)
- Detection of antibodies
 - ELISA
 - HI Test

AIV WGS on Minion device

Primers

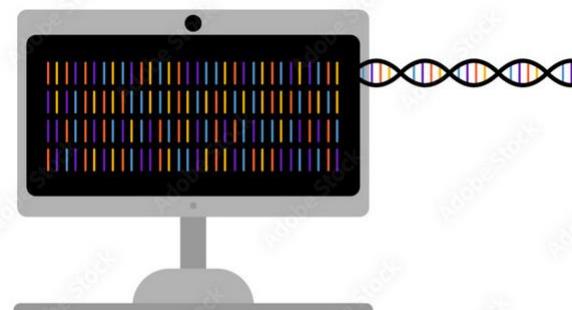

- MTBuni-12 5'-GCGTGATCAGCAAAAGCAGG -3'
- MTBuni-12.4 5'-GCGTGATCAGCGAAAGCAGG -3'
- MBTUni-13 5'- ACGCGTGATCAGTAGAAACAAGG -3'
- SuperScript™ III One-Step RT-PCR System with Platinum™ Taq DNA Polymerase
- Ligation Sequencing Kit V14
- Native Barcoding Kit 24
- MinION Mk1B

AIV WGS on Minion device

Bioinformatic

- Basecalling - Guppy
- Assembly - Geneious prime
- Assembly - IZSV (Gianpiero Zamperin and bioinformatic team)

A close-up view of a DNA sequence read, showing a grid of blue text on a dark background. The sequence consists of multiple lines of nucleotide bases (A, T, C, G) arranged in a grid pattern.

AIV WGS on Minion device

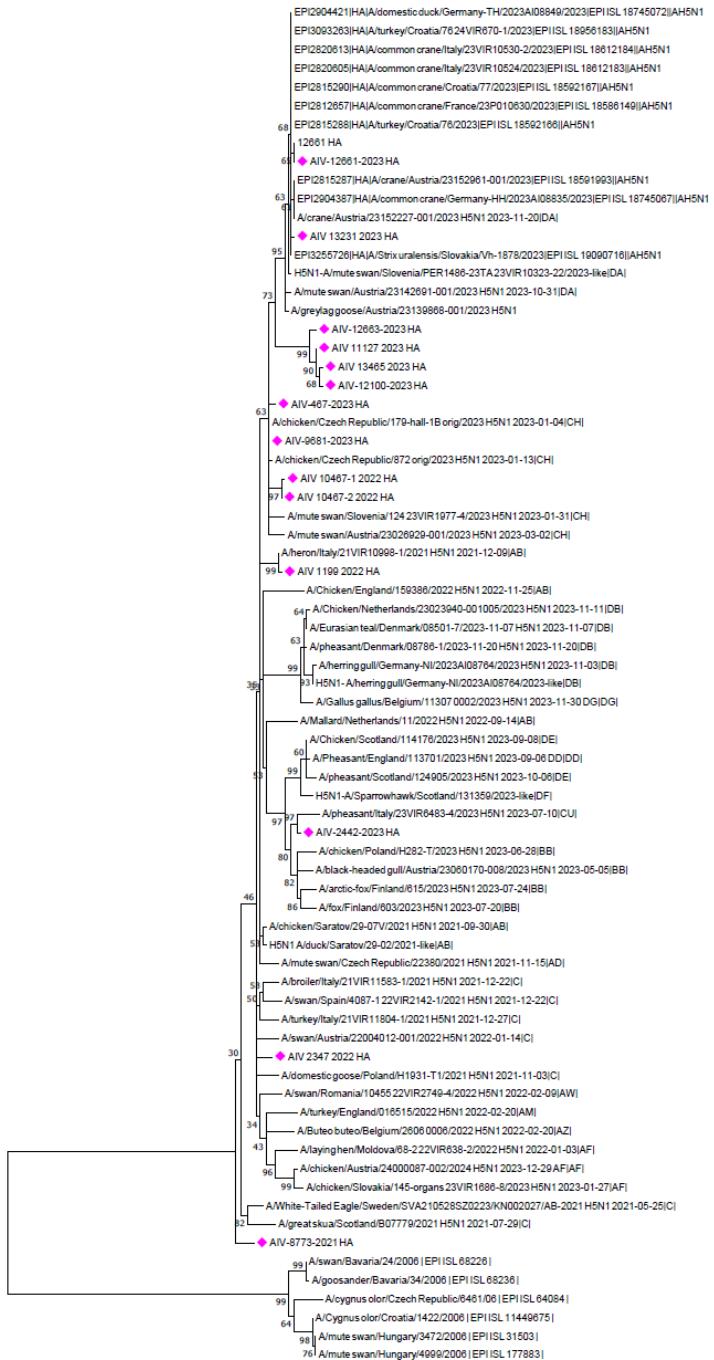

Pathotyping

- HPAI PLREKRRKR/GLF
- HPAI PLRGKRRKR/GLF

Genotyping

- Genotypes within clade 2.3.3.4b
- DA x 6, CH x 4, AB x 1, CU x 1, C x 2,
- 2022: CH, AB, CU and C
- 2023: DA and CH

Phylogenetic tree of 14 Serbian isolates of AIV H5N1 compared with standard panel of reference sequences (IZSV)

Pathotypes, genotypes and CS motifs

Sample ID	Pathotype	CS motif	Genotype	Species
A/mute swan/Serbia/8773/2021 H5N8	HPAI	PLREKRRKRGLF	C	Mute swan
A/white heron/Serbia/1199/2022 H5N1	HPAI	PLREKRRKRGLF	AB	White heron
A/black-headed gull/Serbia/2347/2022 H5N1	HPAI	PLREKRRKRGLF	C	Black-headed gull
A/mute swan/Serbia/10467-1/2022 H5N1	HPAI	PLREKRRKRGLF	CH	Mute swan
A/mute swan/Serbia/10467-2/2022 H5N1	HPAI	PLREKRRKRGLF	CH	Mute swan
A/mute swan/Serbia/11127/2023 H5N1	HPAI	PLREKRRKRGLF	DA	Mute swan
A/mute swan/Serbia/13231/2023 H5N1	HPAI	PLRGKRRKRGLF	DA	Mute swan
A/mute swan/Serbia/13465/2023 H5N1	HPAI	PLREKRRKRGLF	DA	Mute swan

PB2:L89V,PB2:G309D,PB2:T3PB2:L89V,PB2:G309D,PB2:T339K,PB2:R477G,PB2:I495V,PB2:K627E,PB2:A676T	PB2:L89V,PB2:G309D,PB2:T3PB2:L89V,PB2:G309D,PB2:T339K,PB2:R477G,PB2:I495V,PB2:K627E,PB2:A676T	Increased polymerase activity in mammalian cells	H5N1

UPCOMING ACTIVITIES

- Monitoring program will continue in 2024-2025
- WGS sequencing of isolates from 2021 and 2024 is ongoing
- Training of stuff in bioinformatic

THANK YOU FOR YOUR ATTENTION
